Clarification Notice CCE-011

Calculation for Discount of FFA (Free Fat Acids) and Phosphorous excess
Application: ANEC Contract 81
Effective from 01st March 2024

The ANEC's External Contracts Committee (CCE) clarifies the method for calculation of above discounts:

Example of discounts for excess of FFA:

If the total invoice amount is US$ 1,000,000.00

When FFA content is 1.01%
US$ 1,000,000.00 * 0.6% = US$ 6,000.00 of discount

When FFA content is 1.03%
US$ 1,000,000.00 * 0.6% = US$ 6,000.00 of discount

When FFA content is 1.07%
US$ 1,000,000.00 * 0.9% = US$ 9,000.00 of discount

When FFA content is 1.18%
US$ 1,000,000.00 * 1.2% = US$ 12,000.00 of discount

Example of discounts for excess of Phosphorous:

If the total invoice amount is US$ 1,000,000.00

When Phosphorous content is 0.021%
US$ 1,000,000.00 * 0.2% = US$ 2,000.00 of discount

When Phosphorous content is 0.022%
US$ 1,000,000.00 * 0.4% = US$ 4,000.00 of discount

When Phosphorous content is 0.023%
US$ 1,000,000.00 * 0.6% = US$ 6,000.00 of discount

When Phosphorous content is 0.024%
US$ 1,000,000.00 * 0.9% = US$ 9,000.00 of discount

When Phosphorous content is 0.025%
US$ 1,000,000.00 * 1.2% = US$ 12,000.00 of discount
